<b>Keynote speaker</b>		
Prof. Wout van Bommel 	worked for more than 35 years with Philips Lighting in different lighting application functions. He has carried out research into many different lighting subjects. Some concepts now used in international standards for lighting are based on his research work. He became responsible for the company's international lighting application knowhow centre. For the period 2003 - 2007 he has been President of the International Lighting Commission, CIE.	
陳宗弘總經理 	Tsunghung Chen, serves as the General Manager of Sales and Marketing of UL Greater China, is responsible for business performance and marketing management in Taiwan, Hong Kong and China. Tsunghung Chen joined UL as the Managing Director of Taiwan in 2006 and was responsible for the Taiwan operations and managements. His career with HP covered the fields of customer support, marketing, business planning, managing operational excellence, and performance improvement & quality execution. Tsunghung Chen holds a bachelor's degree and a master's degree in Applied Mathematics (Computer Science) from National Chung-Hsing University.
